Edna

United States Senate
Minority Leader

ELECTRONICS

, 1964

Dear :

I have your recent letter concerning the injury which the domestic electronics industry might sustain through any reduction of duties at the Geneva conference. I have already expressed my opposition to any such reduction to both the United States Tariff Commission and the Trade Information Committee. I am advised by both of these groups that every consideration is being given to my request as well as to the statements that were presented before these committees when they conducted hearings on the matter.

Sincerely,

Everett McKinley Dirksen
