

United States Senate

MANDATORY ZIP CODING ROBO

, 1965

Dear :

Thank you for your recent communication expressing opposition to the announced intent of the Post Office Department to require the use of ZIP coding and pre-sorting of second and third class mail.

There has been quite a substantial amount of mail on this and I have been in touch with postal representatives regarding their position in the matter. The enclosed copy of a letter from the Assistant Postmaster General, Bureau of Operations, is in response to my inquiry and presents general background information in explanation of the Department's proposals. I am also enclosing a copy of H.R. 5180 and assure you of my most careful and thoughtful consideration of its provisions at such time as it may come on in the Senate for action.

Sincerely,

Everett McKinley Dirksen
