This is to acknowledge your recent communication regarding the Everglades National Park.

I have discussed this matter with individuals intimately involved in the deliberations on the future of the jetport and the Everglades. It is my understanding that a number of studies are being completed which focus on all the relevant issues. I can share with you my confidence that a feasible solution will evolve from these reports which will take into account the interests of the state of Florida.

I am giving the matter my close attention. The benefit of your thinking is appreciated.

Sincerely,

Everett McKinley Dirksen
