Dear:

The Administration has submitted a farm program for the coming year, but no actual legislation has been introduced as yet.

After reading the President's message, it seems to me that his farm program consists merely of continuing present programs now in effect. I do not believe that will provide the relief which the farmer needs and it will therefore be necessary for those of us in the Congress who feel that farmers are entitled to a better break to see what can be done about revamping the program.

Sincerely,

Everett McKinley Dirksen
