November 17, 1967

Dear:

I do appreciate your concern and want to thank you for writing me on the Murphy Amendment to S.780, the Clean Air bill.

As you no doubt know, Senator Murphy's Amendment passed both Houses of Congress and the bill as a whole has been assigned for further action to a Conference Committee. The conferees recently approved a far-reaching three-year authorization of measures to eliminate air pollution. The bill does permit California to set and enforce stricter standards than those of the Federal Government.

It is a pleasure to have your views on this important matter.

Sincerely,

Everett McKinley Dirksen
