April 26, 1967

Dear:

The interest is growing rapidly in emergency strike legislation as it affects both trucks and rail carriers. Three or four different proposals are presently before us including the so-called Presidential Finality Bill. The first task is to get committee action on this or some other measure so that it can come to the Floor of at least one branch of Congress. Thereafter it will take its course and can be modified to meet not only the present situation but future emergencies.

Sincerely,

Everett McKinley Dirksen
